MotifXF GM SoundFont, represents an interesting addition to the list of GM soundfonts banks made up to now. GoldMidiSF2. With our collaborators, in terms of compactness and musical performance, we wanted to make available to fans of the famous MOTIF XF timbres, a GM bank with the greatest number of instruments necessary for excellent reproduction of musical files in MIDI GM and Kar format. Sampling at 16it also allowed us to get virtually close to the wonderful MOTIF XF keyboards, giving MIDI a much better reproduction.
