

Symphony Orchestral Library SoundFont provides three professional-level libraries with all the power of a full orchestra and the best solo instruments. The "Brass", "Strings" and "Woodwind" libraries are in SoundFont "sf2" format and add a total of 145 orchestral presets such as (Strings, Brass and Winds) up to three dynamics, 443 instruments and almost 10,000 real samples. Furthermore, for the purchase of all three libraries, we offer a totally "FREE" GM SoundFont with the main orchestral instruments, to facilitate the playback of MIDI files, especially classical and symphonic music.
